

Dermal Clinics

“We now recycle nearly everything that we use in our treatments. The weekly collection of our general waste bin is now monthly – we’ve cut it down by 75%! Previously we’d fill two large recycling bins every fortnight, so we’re very happy that SSA now collects it to be recycled the right way and to support the community. Our clients are so inspired that they return any empty skincare packaging they purchase from us to include in our SSA collections.”

James Vivian,
James Vivian Dermal Therapies, VIC

Barbers

“We introduced SSA into The Eastside Barbershop not long after we launched it in our salon, Catal Hair Concepts. Our barber staff wanted to know why the salon was sustainable and the barbershop wasn’t, so we knew then that if they were passionate about it the clients would be too! We made finalist in our Council’s business awards for our sustainable practices and we’ve gained many new clients whom are also passionate about saving our planet.”

Amanda Nedza and Robert Catalano,
The Eastside Barbershop, VIC

POOCHES AND PEDICURES, OH MY!

Did you know that the Sustainable Salons Australia program began in the hairdressing industry and now creates waste solutions for pet-groomers, beauty salons, dermal clinics and barbershops? *The movement is spreading!*

Pet-Groomers

“Becoming a part of the Sustainable Salons family has given us the opportunity to teach people that even their pooch can help keep our planet beautiful. We love educating our clients about how hair clippings are collected to help clean up oil spills! The most gratifying part is taking out our general waste at the end of the week and seeing how little we have! It just goes to show how much of our waste can be recycled for the greater good.”

Alysha Magazinovic,
DOGUE, Brighton VIC

Beauty Salons

“When I researched the positive impact SSA had on the hair industry I knew I wanted to get involved! SSA has given my team and me not only a point of difference but also a great sense of contribution to our environment and our community. After all, while doing what we love, why not go that tiny step further to help the environment? We teach our children to respect each other and I believe it’s just as important to teach them to respect the environment.”

Nicola Le Lievre,
In Therapy, QLD
